PROFESSIONAL SUMMARY

Accessibility Developer and Tester with 2+ years of hands-on experience in web accessibility (a11y) at D2i Technology, a leading WCAG and ADA compliance company based in Noida. Skilled in performing accessibility audits, fixing WCAG 2.1/2.2 AA violations, and building inclusive UI components using React JS. Proficient in both manual and automated accessibility testing using axe DevTools, Lighthouse, WAVE, NVDA, JAWS, and VoiceOver. Currently improving accessibility conformance on the LimeSurvey open-source survey platform. Also experienced in accessibility testing and remediation on the D2i Technology corporate website. Strong knowledge of WAI-ARIA, semantic HTML, keyboard navigation, focus management, and accessible form design.

SKILLS

Accessibility Testing: WCAG 2.1, WCAG 2.2, ADA Compliance, Section 508, axe DevTools, Lighthouse, WAVE, Accessibility Auditing, Manual Testing, Automated Testing, ADA Testing

Assistive Technologies: NVDA, JAWS, VoiceOver, Keyboard Navigation Testing, Screen Reader Testing

Accessibility Development: WAI-ARIA, Semantic HTML5, Focus Management, Color Contrast Analysis, Accessible Forms, Skip Links, Live Regions, Role, State, and Property Management

Frontend Development: React JS, Vite, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, REST API Integration, Responsive Design

Tools and Workflow: Git, GitHub, GitLab, Bitbucket, Postman, VS Code, Figma, Agile, Scrum, JIRA

WORK EXPERIENCE

Accessibility Developer and Tester

D2i Technology | Noida, India (On-site) | February 2025 - Present

- Conducted end-to-end accessibility audits on multiple web projects to identify WCAG 2.1 and WCAG 2.2 AA violations including missing ARIA labels, improper heading structure, insufficient color contrast, and inaccessible keyboard navigation.
- Performed manual accessibility testing using screen readers NVDA and JAWS on Windows, and VoiceOver on macOS, documenting issues with steps to reproduce, actual result, and expected result.
- Executed automated accessibility testing using axe DevTools, Lighthouse, and WAVE to complement manual testing and generate audit reports.
- Remediated identified accessibility issues in HTML, CSS, and React JS codebases, including fixing ARIA roles, states, and properties, skip navigation links, focus order, and form label associations.
- Developed accessible, semantic UI components in React JS ensuring compatibility with assistive technologies and compliance with WAI-ARIA authoring practices.
- Collaborated with UI/UX designers and QA teams to integrate accessibility requirements from the design stage through to production deployment.
- Built and maintained scalable React JS and Vite applications with Redux Toolkit for state management and Axios for REST API integration.
- Managed version control and code reviews via Git using GitHub and GitLab with proper branching strategies.

Frontend Developer Intern

Bharat Intern | Bhopal, India (Remote) | August 2024 - September 2024

- Built React and Vite applications using reusable, component-based architecture.
- Developed responsive UIs using Tailwind CSS for desktop and mobile viewports.
- Managed code using Git and GitHub including branching, pull requests, and code reviews.

PROJECTS

LimeSurvey - Accessibility Improvement | limesurvey.org

February 2025 - Present (3 Months) | Role: Accessibility Developer and Tester | Client Project at D2i Technology

- Working on improving accessibility conformance of LimeSurvey, a widely used open-source online survey platform used by organizations globally.
- Conducting accessibility audits across survey creation, form, and response interfaces to identify WCAG 2.1 AA violations.
- Testing and remediating issues related to survey form field labeling, error identification, focus management, and keyboard-only navigation flows.
- Running screen reader testing using NVDA and JAWS to validate that dynamic survey components, modal dialogs, and form validation messages are correctly announced.
- Using axe DevTools and Lighthouse to run automated accessibility scans and track remediation progress across releases.
- Collaborating with the development team to fix HTML structure, ARIA attributes, and focus trapping in modal and dropdown components.

D2i Technology Corporate Website - Accessibility Audit and Fix | d2itechnology.com

February 2025 - Present | Role: Accessibility Developer and Tester | Internal Project at D2i Technology

- Performed a full accessibility audit of the D2i Technology corporate website to ensure the company's own platform meets WCAG 2.1 AA standards.
- Identified and resolved accessibility issues including missing image alternative text, unlabeled form fields, incorrect heading hierarchy, and low color contrast ratios.
- Conducted keyboard navigation testing to ensure all interactive elements including navigation menus, buttons, and forms are fully operable without a mouse.
- Tested with NVDA and JAWS screen readers to verify proper reading order, ARIA landmark regions, and button and link name announcements.
- Fixed semantic HTML structure and applied WAI-ARIA attributes to improve compatibility with assistive technologies.
- Validated fixes using axe DevTools and WAVE and documented before-and-after results for client reporting.

EDUCATION

Bachelor of Technology - Computer Science Engineering

Bharat Institute of Technology, Meerut, India | July 2020 - July 2024

Intermediate Certificate | Shree Guru Ram Rae Public School, Muzaffarnagar | 2019 - 2020

High School Diploma | Golden Public School, Muzaffarnagar | 2016 - 2017

LANGUAGES

English - Advanced (C1) | Hindi - Bilingual (C2) | Urdu - Intermediate (B1)
